ABOUT ME

Cybersecurity-focused Computer Science graduate with hands-on knowledge of networking, Linux, Python scripting, security monitoring, and log analysis. Skilled in threat detection, vulnerability assessment, network security, and security event analysis. Experienced in building practical SOC and threat intelligence projects using Python and Streamlit.

EDUCATION

Institute of Engineering and Technology <i>Bachelor of Technology (B.Tech) in Computer Science and Engineering</i>	Lucknow, Uttar Pradesh 2026
--	--------------------------------

TECHNICAL SKILLS

Cybersecurity	: Security Monitoring, Log Analysis, Threat Detection, Vulnerability Assessment, Incident Response, IOC Analysis, Phishing Detection, Network Security
Networking	: TCP/IP, OSI Model, IP Addressing & Subnetting, DNS, DHCP, HTTP/HTTPS, SSH, VPN, NAT, VLAN, Routing, Switching, Network Ports
SIEM&Security Tools	: Splunk, Microsoft Sentinel, Wireshark, Nmap, Burp Suite, Sysmon, Zeek
Linux & Windows	: Linux Administration, File Permissions, Users & Groups, Bash Scripting, Processes, System Logs, Cron Jobs, Windows Event Logs, Active Directory, Group Policy
Programming	: Python, JavaScript, Java, C++
Web Development	: React.js, Node.js, Express.js, REST APIs, HTML, CSS, Tailwind CSS
Databases	: MongoDB, MySQL

EXPERIENCE

Data Analyst <i>Althexus</i>	07/2026 – Present <i>Remote</i>
- Analyzed and organized business and operational data to identify trends and support data-driven decision making. - Worked with datasets to perform data cleaning, analysis, and reporting using Python and relevant data analysis tools. - Prepared reports and insights to support business and operational requirements.	
Business Development Associate <i>Averix Solutions</i>	Jan 2026 – Jul 2026 <i>Bangalore</i>
- Identified and qualified potential business opportunities through market research and lead generation activities. - Engaged with prospective clients and presented technology and digital service offerings. - Collaborated with sales and operations teams to support client acquisition and revenue growth initiatives. - Maintained business development records, prepared reports, and contributed to target-driven business operations.	

PROJECTS

AI SOC Analyst Dashboard	Source Code
- Developed a Python and Streamlit-based SOC dashboard to analyze security logs and monitor potential threats. - Implemented log analysis, risk scoring, threat classification, and incident reporting features. - Generated SOC-style alerts and dashboards for malware, SQL injection, brute-force, and authentication attacks.	
AI Threat Intelligence Platform	Source Code
- Built a Python and Streamlit-based platform to analyze cyber threat feeds and detect Indicators of Compromise (IOCs). - Implemented automated IOC extraction, malware indicator detection, threat categorization, and risk scoring. - Generated threat intelligence reports and interactive dashboards for monitoring security events.	
Cybersecurity Toolkit GUI	Source Code
- Developed a Python and Tkinter-based cybersecurity toolkit for performing basic security assessments. - Integrated Port Scanner, Vulnerability Scanner, Phishing Detector, Password Generator, and Report Generator modules. - Generated security assessment reports through an interactive desktop interface.
